

## 10W40

### SEMI SYNTHETIC

Semi synthetic engine oil designed with the latest additives system which exceeds industry's highest API performances level and outperforms conventional oils.

#### BENEFITS

- Excellent thermal and oxidation stability preventing deposits and sludge build up to enable long engine life.
- Outstanding high shear/high temperature performance reduces engine scuffing and bore polishing.
- Minimize oil consumption under severe condition through viscosity retention.
- Improves energy efficiency.

#### COMPATIBILITY

API SN/CF  
ACEA A3/B4/E2  
MB 229.1  
VW 501.01/502.00/505.00

For high performance engine oil specially developed for modern diesel and petrol engines. It meets and exceeds the requirements of engine manufacturers and ideally for all mixed fleet and machineries under all conditions. Compatible with certain motorcycles.
