

10W60

PAO

PAO & Ester based fully synthetic racing motor oil formulated to give maximum margins of protection during periods of fast road or competition use. It exceeds the performance requirements of many engine manufacturers.

BENEFITS

- Maximum engine performance and protection.
- Reduces engine deposits to help maximize engine response.
- Delivering great all-round performance.
- Formulated for extreme driving conditions and motorsport applications.
- Exceptional anti-wear performance.
- Excellent shear stability with outstanding high temperature performance.

COMPATIBILITY

API SN/CF
ACEA A3/B4

Suitable for use in turbocharged, supercharged and naturally aspirated diesel and gasoline engine, particularly recommended for high performance engines where required to operate under higher pressures with excellent strength and performance credentials.
